

People say it's tough being in LESC
Im sure no one here would disagree
While we all pursue a PhD
A fulfilling journey is never a guarantee

In today's retreat, set your mind free
Pay no mind, to your engineering degree
Actively participate, give it your all
and all else fails, there is always alcohol

We'll try our best, put ourselves to the test
To make today's events one that would impress
All we ask for, is not much more
Than your enthusiastic participation, when you've entered that door
